63433_45662_leaflet_MPL_V01 Dimension: 14 cm x 17 cm Scale: A4 100% A3 100% Date: 14/10/2010

GENERAL INSTRUCTIONS

Weeds should be sprayed while actively growing and at their most susceptible stage. As a general guide, annuals should be sprayed when young and perennials just prior to appearance of bud stage. Extremes of cold or drought are unfavourable. The best conditions are when the soil is moist, weather fine and rain unlikely within 6 hours of application.

APPLICATION/MIXING INFORMATION

AERIAL SPRAYING - Use 10-90 L water per hectare.

This product mixes readily with water. Half fill the spray tank with clean water and add the required amount of product. Agitate thoroughly before adding the remaining water. BOOM SPRAYING - Use 30-120 L water per hectare. - Use minimum of 170 L water per hectare for

RESISTANT WEEDS WARNING GROUP HERBICIDE

Sanonda MCPA 500 Selective Herbicide ('MCPA 500') is a member of the Phenoxys group of herbicides. MCPA 500 has the Disruptors of plant cell growth mode of action. For weed resistance

management MCPA 500 is a Group I herbicide. Some naturally-occurring weed biotypes resistant to MCPA 500 and other disruptors of plant cell growth herbicides may exist through normal genetic variability in any weed population. The resistant individuals can eventually dominate the weed population if these herbicides are used repeatedly. These resistant weeds will not be controlled by MCPA 500 or other disruptors of plant cell growth herbicides. Since the occurrence of resistant weeds is difficult to detect prior to use, Sanonda Australia Pty Ltd accepts no liability for any losses that may result from the failure of MCPA 500 to

EQUIPMENT MAINTENANCE AND USAGE

Equipment that has been used for this chemical should not be used for the application of other materials to sensitive plants unless it has been cleaned with commercially available tank and equipment cleaner or well washed out with a 2% solution of cloudy ammonia followed by several

COMPATIBILITY/TANK MIXES

This product can be tank mixed with Agility®, Ally®/Associate, Kamba®, Bromicide®, Flowable Diuron, Archer, Sertin®, Sprayseed®, Flowable Terbutryn, Tordon® and Tribunil®. The effectiveness of Comrad, and Dimethoate may be reduced by alkaline hydrolysis if tank mixed with this product. When tank mixing add the required amount of compatible product (and surfactant if recommended) when the spray tank is nearly full and while continuously agitating. If left overnight, agitate thoroughly

PROTECTION OF CROPS, NATIVE AND OTHER NON-TARGET PLANTS DO NOT spray in high winds. DO NOT spray crops or weeds outside the stages indicated in "Critical

Comments" as damage, loss of yield or inadequate weed control may result. — 7 —

Drift Warning: DO NOT apply under weather conditions or from spraying equipment that may cause spray to drift onto nearby susceptible plants/crops, cropping lands or pastures. Avoid spray drift onto susceptible crops such as cotton, tobacco, tomatoes, vines, fruit trees, vegetables, legume crops and pastures, oilseed crops and susceptible trees (eg. kurrajongs, belahs, eucalypts).

Legume Tolerance: The use of MCPA is preferred to 2,4-D Amine (Amicide) or Ester (Estercide) in situations where legumes are undersown in the crop. NB: The tolerance of pasture legumes to applied product can vary with species, variety, growing conditions, stage of growth and companion crop cover. DO NOT spray cereal crops undersown with lucerne as damage may result.

PROTECTION OF LIVESTOCK Low hazard to bees. May be applied at any time as recommended in the Directions for Use.

PROTECTION OF WILDLIFE, FISH, CRUSTACEANS AND ENVIRONMENT DO NOT contaminate dams, rivers or streams with the product or used containers.

STORAGE AND DISPOSAL (5 L, 20 L only):

Store in the closed, original container in a dry, cool, well-ventilated area away from children, animals, food, feedstuffs, seed and fertilizers. DO NOT store for prolonged periods in direct sunlight. Triple or preferably pressure rinse containers before disposal. Add rinsings to spray tank. DO NOT dispose of undiluted chemicals on site. If recycling, replace cap and return clean containers to recycler or designated collection point. If not

should not be burnt. Envirodrum 110 L Mini Bulk Returnable Container:

Store the original sealed Envirodrum in a dry, cool, well-ventilated area away from children, animals, food, feedstuffs, seed, and fertilizers. DO NOT store for prolonged periods in direct sunlight. DO NOT tamper with the Micro Matic valve or

recycling, break, crush or puncture and bury empty containers in a local authority landfill. If no landfill

is available, bury the containers below 500 mm in a disposal pit specifically marked and set up for

this purpose clear of waterways, desirable vegetation and tree roots. Empty containers and product

the security seal. DO NOT contaminate the Envirodrum with water or any other foreign matter. After each use of the product, please ensure the Micro Matic coupler, delivery system and hoses are disconnected, triple rinsed with clean water and drained accordingly. When the contents of the Envirodrum have been used, please return the empty Envirodrum to the point of purchase. The Envirodrum remains the property of Sanonda Australia Pty Ltd.

SAFETY DIRECTIONS

Harmful if swallowed. Attacks eyes. Will irritate the skin. When preparing spray and using the prepared spray wear cotton overalls buttoned to the neck and wrist and a washable hat, elbow-length PVC gloves and goggles. If product in eyes, wash it out immediately with water. After use and before eating, drinking or smoking, wash hands, arms, and face thoroughly with soap and water. After each day's use wash gloves, goggles and contaminated clothing.

WEED TABLE: Where weeds are to be sprayed in a crop or pasture use only the rates given for particular crop or

situation indicated under the Directions for Use table. In most cases this will give control, however some hard to kill weeds or those in advanced stages of growth may only be suppressed. The rates listed in the Weed Table below are for use where weeds only are present and no crop or pasture is involved. Use at these rates in a crop or pasture other than for spot spraying may cause damage. This product should only be used in those states where a rate or range of rates is indicated for the particular weeds listed.
